- Led a team of 3 volunteers to complete a community service project and developed a website to help old age people to get information about health issues.
- Survived as a Mentor for 1 year with a team of 4 members to build communication skills.

PROJECTS

Community Service Project: Creating Awareness on Basic HealthCare and Yoga Practices

Description:

Our project is designed for creating Awareness on health issues and their treatments in an understanding way for elderly people. Our main aim is to educate and empower individuals to take control of their health and wellbeing through awareness on basic healthcare and yoga practices. We believe that everyone deserves to live a healthy and fulfilling life, and we're here to guide you on that journey. we have created a user-friendly platform to express our solution. In this we used to provide updated information about every particular health issue which are majorly affected by the old age people in recent times. we provided latest treatment used to cure and proper medications for the issue. We also used to provide information about natural remedies to cure rather to go for medical treatments. natural remedies including proper diet ideas and yoga practices for old age people. we provided videos that directed from website to YouTube by clicking on video to show Yoga Asanas which helps for better and clean understanding. For developing this we used HTML, CSS and MySQL. This platform showcases the need of gaining information about health care and its remedies.
